

How much does tobacco use cost you?

Do the Math

$$\frac{\text{Total Number of Employees}}{\text{Total Number of Employees}} \times \frac{16.7\%}{\text{NYS Adult Smoking Rate}} = \frac{\text{Number of Smokers}}{\text{Number of Smokers}}$$

(or, if known, enter number of employees)

$$\frac{\text{Number of Smokers}}{\text{Number of Smokers}} \times \frac{\$1,943}{\text{Estimated Health Care Costs}} = \frac{\text{Total Health Costs}}{\text{Total Health Costs}}$$

$$\frac{\text{Number of Smokers}}{\text{Number of Smokers}} \times \frac{\$1,791}{\text{Lost Productivity Costs}} = \frac{\text{Total Lost Productivity Costs}}{\text{Total Lost Productivity Costs}}$$

Your Total Cost per Smoker is:

$$\frac{\text{Total Health Costs}}{\text{Total Health Costs}} + \frac{\text{Total Lost Productivity Costs}}{\text{Total Lost Productivity Costs}} = \frac{\text{Total Cost per Year}}{\text{Total Cost per Year}}$$
